DETAILED ACTION

The amendment and remarks filed on 10/29/07 have been acknowledged and entered.

Claim Rejections - 35 USC § 112

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claims 29-53 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In claim 29, line 19, "tolerance range" is indefinite term.

In claims 32, 40, line 2, "variably " is indefinite term.

In claim 36, "of possible direction" is indefinite term.

In claim 50, line 2, "least of" is indefinite term.

Claim Rejections - 35 USC § 103

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claims 29-53 are rejected under 35 U.S.C. 103(a) as being unpatentable over WO 95/04203 (WO'203).

Re. claims 29-52, WO'203 discloses a method and device for cleaning a surface of a component (12) using cleaning device (1), wherein the component surface is cleaned by a cleaning head (13) that can be moved by a positioning device whilst generating pressure to press the cleaning head onto the component, the positioning device has a rough positioning system (7, 8, 9) and a fine positioning system (11), and the cleaning head is moved to a force-controlled manner by the fine positioning system in one direction of movement. See the document in general, and Figs. 1-6.

The reference discloses all limitations with the exception of the cleaning head has three-dimensionally extending cleaning surface and at least one stop shoulder whose cleaning stop surface can be moved frontally onto an edge of the component whilst generating pressure, the cleaning head being moved along at least one axis of movement by a fine positioning system within a predetermined tolerance window.

It would have been obvious for one skilled in the art to use the process and device taught by WO'203 for cleaning the surface as claimed. This is because changing the shape and the direction of movement of the cleaning head depends on the shape of the surface to be cleaned, see page 4, line 21- page 5, line 6, page 7, lines 19-24, and page 8, lines 11-17, and lines 24-26.

Re. claim 53, WO'203 does not teach cleaning the vehicle body as claimed.

It would have been obvious for one skilled in the art to use the device taught by WO'203 to clean the vehicle body, because the reference discloses that the equipment can be adjusted to suit any task which calls for surface treatment in a precise manner, see page 8, lines 24-26. This is also because It has been held that a recitation with respect to the manner in which a claimed apparatus is intended to be employed does not differentiate the claimed apparatus from a prior art apparatus satisfying the claimed structural limitations. *Ex parte Masham*, 2 USPQ2d 1647 (1987).

Response to Arguments

Applicant's arguments filed 10/29/07 have been fully considered but they are not persuasive. Applicants' argument with respect to WO'203 is unpersuasive for the reason set forth before in paper No. 20070620 .

Conclusion

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
